

SURROGACY MADE EASY

Transport frozen breast milk from surrogate to your baby with the Milk Stork Stash.

Following the birth, some gestational surrogates will provide pumped breast milk for the baby. Milk Stork makes the process of shipping expressed breast milk easy for both surrogates and the family.

Milk Stork's easy-to-use Stash Shipper™ and Stash Mover™ hold up to 180 ounces* of frozen breast milk and keep breast milk frozen for up to 96 hours with no dry ice.

How do I transport my breast milk?

The Stash **SHIPPER**

Best when your surrogate will be shipping frozen breast milk to you and your baby. The Stash Shipper includes a pre-addressed FedEx Priority Overnight shipping label to send the frozen breast milk to your home.

The Stash **MOVER**

Best when you are located near the surrogate and can transport your frozen breast milk by car. The Stash Mover does not include a shipping label to ship the milk to another destination.
